Capt. Kauffman,
We will be targeting the products we expect will be utilized and are traditional selections for the timber companies. When I have them set up and running we'll be in touch, but welcome all input. Dr. Ken Giles of UCD will provide some expertise, we will follow his experienced guidance overall for the project.
Best Regards,
Stu Turner, CPAg

Maya,

Would you be willing to share your sampling plan? It would be helpful to know which herbicides you are targeting, how long the sampling devices will be deployed, and what method the lab is going to run to analyze the samples.

Richard

Thank you Richard!
We are welcoming all inquiries , tips ,guidance from EPA's team.
We are very open to your involvement to what ever degree you wish.

All of the equipment has arrived and we are getting the schedule set up
with Stu Turner,who is setting the air samplers up for us.
At this point it looks like they will be set up next week.
Please include him in the conversation as well.
Thanks again,
Maya

Hello, Maya,

I raised the topic of your air sampling plan in a meeting with EPA
this
morning, and if you would find it helpful, EPA has offered to have
their
sampling experts take a look at your plan and provide any relevant
advice. I have copied Sheila, Elizabeth, and Scott on this message.

Richard

Subject: AIR TESTING IS GETTING SET UP

Hi all,
Just to up date Richard,Jae and Karen,
We are hiring a professional to set up ,calibrate our air testing
units ,that will be set up at couple different locations at the home
sites of people tested positive with Timber industry poison
pesticides.
We are using state of the art equipment,that EPA uses.

TE-1000PUF..... complete system
TE-5040 PUF calibration kit.
TE-QMA4 micro-quartz media
TE-1009...glass cartridge w/ steel screens.
Will be set up by a professional,all done legitimately.
We'll have a base sampling done first.
We are looking forward to share this information with you!
Thanks,
Dan and Maya
p.s. We are taking charge to test the most important element ,since we
know that AIR is the MAIN pathway that our families are being
sickened
by the constant low pesticide exposure ,through revolatalization of
poison soaked mountains,even months and years after so called spray
"season".
